

CLAIMS

1. A selective bird feeder, comprising:  
 a selective housing having at least one sidewall and a base;  
 a removable top supported by the at least one sidewall of the selective housing;  
 and  
 a seed holder contained within the selective housing.

2. The selective bird feeder of claim 1, further including a space disposed between a sidewall of the seed holder and the at least one sidewall of the selective housing.

3. The selective bird feeder of claim 2, wherein the space is about 1.0 inches.

4. The selective bird feeder of claim 3, wherein the space is about 1.5 inches.

5. The selective bird feeder of claim 4, wherein the space is about 2.0 inches.

6. The selective bird feeder of claim 1, wherein the seed holder is supported on the base of the selective housing.

7. The selective bird feeder of claim 6, wherein the base of the selective housing is substantially solid.

09816046-032301

8. The selective bird feeder of claim 6, wherein the base of the selective housing includes apertures.

9. The selective bird feeder of claim 1, wherein the at least one sidewall of the selective housing includes apertures having a maximum dimension of about 1.0 inches.

10. The selective bird feeder of claim 1, wherein the at least one sidewall of the selective housing includes apertures having a maximum dimension of about 1.5 inches.

11. The selective bird feeder of claim 1, wherein the at least one sidewall of the selective housing includes apertures having a maximum dimension of about 2.0 inches.

12. The selective bird feeder of claim 6, wherein the top of the selective housing is substantially solid.

13. The selective bird feeder of claim 6, wherein the top of the selective housing includes apertures.

14. The selective bird feeder of claim 1, wherein the top of the selective housing includes apertures having a maximum dimension of about 1.0 inches.

15. The selective bird feeder of claim 1, wherein the top of the selective housing includes apertures having a maximum dimension of about 1.5 inches.

16. The selective bird feeder of claim 1, wherein the top of the selective housing includes apertures having a maximum dimension of about 2.0 inches

09816016-033

Are these shown?

1           17.    The selective bird feeder of claim 1, wherein the removable top directly  
2           contacts the seed holder.

1           18.    The selective bird feeder of claim 17, wherein the seed holder includes  
2           a cap, and the removable top directly contacts the cap.

1           19.    The selective bird feeder of claim 1, wherein the removable top is  
2           spaced apart from the seed holder.

1           20.    The selective bird feeder of claim 1, wherein the removable top  
2           includes an aperture through which a portion of the seed holder extends.

1           21.    The selective bird feeder of claim 19, wherein the seed holder includes  
2           a cap, and further comprising a space between the removable top and the cap.

1           22.    The selective bird feeder of claim 21, wherein the spacing between the  
2           cap and the removable top is adjustable.

1           23.    The selective bird feeder of claim 21, wherein the spacing between the  
2           cap and the removable top is adjustably limited.

1           24.    The selective bird feeder of claim 1, wherein the top of the selective  
2           housing is substantially solid.

1           25.    The selective bird feeder of claim 1, wherein the top of the selective  
2           housing includes apertures.

00016046-0222304

Sub 4  
1 26. The selective bird feeder of claim 1, wherein the seed holder extends  
2 through the top.

1 27. A selective bird feeder, comprising:  
2 a selective housing having a cylindrical sidewall and including apertures  
3 having a width ranging from about 1.3 inches to about 1.7 inches;  
4 a removable top supported at least on the cylindrical sidewall of the selective  
5 housing;  
6 a cylindrical seed holder contained within and spaced apart from the  
7 cylindrical sidewall of the selective housing; and  
8 a hanger attached to the selective bird feeder;  
9 wherein the removable top is in direct contact with the cylindrical seed holder  
10 and the sidewall of the selective housing.

1 28. The selective bird feeder of claim 27, wherein the selective housing  
2 includes a base on which the seed holder is supported.

1 29. The selective bird feeder of claim 27, wherein the seed holder includes  
2 a base on which the selective housing is supported.

1 103? 30. The selective bird feeder of claim 27, wherein the hanger is attached  
2 to the top.

1 103? 31. The selective bird feeder of claim 27, wherein the hanger is attached  
2 to the seed holder.

Sub 5  
1 32. A selective bird feeder, comprising:  
2 a selective housing having at least one sidewall and a base, the at least one  
3 sidewall of the selective housing including a plurality of apertures;

09816016 032301

4 a seed holder at least partially contained within the selective housing and  
5 supported by the base of the selective housing;

6 a space disposed between a sidewall of the seed holder and the at least one  
7 sidewall of the selective housing;

8 a removable top in direct contact with the seed holder and supported by the at  
9 least one sidewall of the selective housing, the removable top including an aperture  
10 through which a portion of the seed holder extends;

11 the seed holder further including a cap spaced apart from the removable top,  
12 and further including a hanger attached to the cap.
